Contact: SGT Justin Wade

E-mail: JBWade@dps.ms.gov

Phone: 662-299-6316

To give the student an awareness and the necessary skills to conduct a traffic accident investigation at the collision site, with emphasis on evidence-gathering techniques and the importance of physical evidence in accident reconstruction and criminal and civil litigation. Upon successful completion of this course, the student will have the proper knowledge to properly:

1. Measure, diagram, photograph, and document physical evidence and other data from a collision site.
2. Interview driver(s) and witnesses and record their statements for later use in the investigation.
3. Make reliable speed estimates of accident vehicles by use of skid marks and scuff mark evidence.
4. Measure and record the positions of vehicles and other objects at the collision site and account for their movement during the accident sequence.
5. Recognize the importance of using evidence and facts to develop intelligent opinions on how the collision occurred in regards to its' chronological order and the dynamics of the collision. Upon completion of this course, the student will have the expertise necessary to advance to a higher level of accident investigation procedures and techniques.
