CHANGE LOG

Date	Version	Change
November 30, 2010	1.0	New document.
December 31, 2010	1.0 R01	Formatting changes and text clarifications.
January 31, 2014	1.0 R02	Change in how to handle unprintable fingers and partially amputated fingers.
		Updated POB, Country of Citizenship, and Driver's License Place of Issuance Codes.
		Addition of palm prints, facial photos, and SMT photos. Addition of Warning Notice.
		Reference to the Tenprint Transaction Reject Notice and Warning Notice Error Messages document.
		Revised use of codes to indicate partial amputations and fully unprintable fingers.
November 12, 2014	1.0 R05	Revised valid values for SSN.
		Revised minimum age for Arrest Type and DOB; added process for Juvenile as Adult under age 14.
		Updated Section 2.3 Palm Prints and added Appendix G.
		Updated POB and Country of Citizenship tables in Appendices B and C based on updated FBI tables.
November 10, 2015	10. R06	Added DNA Database Collection Form

FORWARD

This document is intended to be used in conjunction with documentation and training provided by your live scan vendor. It presents the Mississippi Criminal History System (MCHS) requirements for each field in an arrest transaction. It is consistent with the MCHS Tenprint Interface Control Document (ICD) which describes the requirements for scanning stations which interface with and send arrest transactions to MCHS.

1.0 PURPOSE OF MISSISSIPPI CRIMINAL HISTORY SYSTEM

The Mississippi Criminal History System (MCHS) provides fingerprint-based identification services and Criminal History Record information to the criminal justice community within the State of Mississippi and throughout the country.

The process begins when a person is arrested and booked. The fingerprint impressions and accompanying identification information concerning the person and the arrest are recorded on the live scan and forwarded to MCHS at the Criminal Information Center (CIC). The arrested person's fingerprints will establish positive identification that will link the arrest to previous criminal history information. The Arrest Tracking Number (ATN), which is assigned by the live scan, is the means by which disposition information and arrest information are linked.

If you have any questions regarding supplying the requested information, please call the Criminal Information Center at 800-594-3997 or 601-933-2600.

Periodically, this document is updated. In the future, as required, updated versions of this document will be posted on the DPS public web site.

2.0 RECORDING ARREST INFORMATION AND FINGERPRINTS

Upon the arrest of a person, the arrest/booking agency shall complete the Mississippi Criminal History arrest fingerprint transaction. This includes identification information, fingerprints, and arrest information. The instructions for recording the identification and arrest information are provided on the following pages.

MCHS provides an up-to-date authoritative list of codes and statute citations to each live scan, as described in Appendix A. Using any other codes and statutes will cause the transaction to be rejected. See Appendix A for an explanation of how MCHS and the live scans obtain and provide an up-to-date list of valid codes and statute citations.

Although many of the codes used by MCHS are the same as or similar to NCIC codes, do <u>not</u> use the NCIC Code book.

Do not use phrases or characters such as 'NONE', 'None', 'N/A', 'NA', '\', '/', or '.' to indicate that information is not applicable or unknown.

2.1 Identification Information

Field 1. Originating Agency Case Number.

Record the case number assigned by the arrest agency.

May contain letters, numbers, spaces, and hyphens.

Minimum length is 4 characters; maximum length is 15 characters.

Field 2. Social Security #.

Record up to 4 social security numbers if more than one is associated with the arrested person.

The following SSN patterns are invalid, as the Social Security Administration does not issue numbers with these patterns:

- positions 1 through 3 (area) cannot be 000 or 666 or 900-999
- positions 4-5 (group) cannot be 00
- positions 6-9 (serial number) cannot be 0000
- cannot be 1111111

Field 3. Miscellaneous Id #.

Record <u>both</u> the type of miscellaneous identification number and the number.

Record up to 4 Miscellaneous Numbers. For each, specify the code that identifies the type of miscellaneous number and record the miscellaneous id number.

Miscellaneous Number Type Code:

Specify the type code. Valid codes are:

Miscellaneous Number Type	Type Code
Air Force Serial Number	USAF Serial Nr
Air National Guard or Army or National Guard	USA Serial Nr
Serial Number	
Alien Registration Number	Alien Reg Nr
Bureau Fugitive Index Number	Bureau Fugitive
Canadian Social Insurance Number	Canada Soc Ins
Identification Order Number	Ident Order Nr
Marine Corps Serial Number	USMC Serial Nr
Mariner's Document or Identification Number	Mariner ID Nr
National Agency Case Number	Natl Agency Nr
Navy Serial Number	USN Serial Nr
Originating Agency Policy or ID Number	Orig.Agency ID
Passport Number (U.S. only)	Passport Nr
Personal Identification Number (State Issued Only)	Pers.ID State
Port Security Card Number	Port Sec Nr
RCMP Identification	RCMP ID Nr
Selective Service Number	Draft Card Nr
U.S. Coast Guard Serial Number	USCG Serial Nr
Veterans Administration Claim Number	VA Claim Nr

Miscellaneous Number:

If the type is Air Force Serial Number, the number must be all numeric. The number for all other types may include letters and hyphens.

Field 4. Names (including aliases).

Record the full name and up to 9 additional name variations if appropriate.

Full name:

(e.g., Doe, Jonathan, James, II)

- Record Last Name, First Name, Middle Name, and Suffix in their individual fields.
- Maximum field lengths are: Last Name 35 characters, First Name 20 characters, Middle Name - 20 characters.
- Last, First, and Middle Name may contain hyphens, apostrophes, and spaces.
- Last Name must be at least two characters.
- Middle Name should be a name. An initial can be specified if the name is not known.
- Do not put a middle initial at the end of the first name field
- Suffix must be Jr, Sr, II, III, or IV.
- Do <u>not</u> put the suffix in the last name, first name, or middle name fields.

Aliases including name variations, maiden names, and nicknames:

Name variations and maiden names (e.g., Doe, John, J):

- Record Last Name, First Name, Middle Name, and Suffix in their individual fields.
- Maximum field lengths are: Last Name 35 characters, First Name 20 characters, Middle Name - 20 characters.
- Last, First, and Middle Name may contain hyphens, apostrophes, and spaces.
- Last Name must be at least two characters.
- Middle Name may be name or initial. Do <u>not</u> put a middle initial at the end of the first name field.
- Suffix must be Jr, Sr, II, III, or IV. Do <u>not</u> put the suffix in the last name, first name, or middle name fields.
- Do <u>not</u> type text such as 'Alias', 'AKA', 'Nickname, or 'Maiden' in any name field.

Nicknames (e.g., 'Slim' or 'JJ'):

- Record 'X' in the Last Name field.
- Record the nickname in the First Name field. Maximum length is 20 characters.
- Nickname name may contain hyphens, apostrophes, and spaces.
- Nickname must be at least two characters.
- Do not type text such as 'Alias', 'AKA', 'Nickname', or 'Maiden' in any name field.
- Do <u>not</u> record a Middle Name or Suffix.

Field 5. Place of Birth.

Specify the code representing the place of birth. Must be one of the following: a U.S. state, Washington DC, a single code representing any US territory, a Canadian province, or a country.

Valid codes are found in Appendix B. If the POB is a US territory (e.g., US Virgin Islands), specify 'US'.

It should not be necessary, but if the POB is a U.S. location that is not listed, specify 'US' for Other US locations. It should not be necessary, but if the POB is a foreign country that is not listed, specify 'YY' for Other Non-US country.

Field 6. Country of Citizenship.

Specify the code representing the country of citizenship.

Valid codes are found in Appendix C.

It should not be necessary, but if the Country of Citizenship is not listed, specify 'YY' to indicate Other Non-US country.

Field 7. Date of Birth.

Record up to 5 dates of birth if more than one is associated with the arrested person.

Record the date in the format YYYYMMDD (e.g., 19800205).

Date of Birth must be consistent with the criteria specified in Arrest Type (Field 23).

Field 8. Sex/Gender.

Specify one of the following: Male or Female.

Field 9. Race.

Specify the race code. Valid codes are:

Race Code	Description
Amerind	American Indian, Eskimo, Alaskan native, or a person having origins in any of the 48 contiguous states who maintains cultural identification through tribal affiliation or community recognition.
Asian	Chinese, Japanese, Filipino, Korean, Polynesian, Indian, Indonesian, Asian Indian, Samoan, or any other Pacific Islander.
Black	A person having origins in any of the black racial groups of Africa.
White	Caucasian, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.
Other	Other or of indeterminate race.

Field 10. Scars, Marks, and Tattoos.

Record the type/location of the SMT and a description of it. Record any of the following categories of SMTs: Aids, Artificial, Deaf, Deformities, Medical Condition, Missing, Moles, Other Characteristics, Removed Tattoos, Scars, Skin Discolorations, Tattoos.

Record up to 10 SMTs. For each, specify the type/location and record the description (e.g., SMT Code: TAT L ARM; SMT Description: Large Red Rose).

Always specify the SMT code. For tattoos, always provide the description of the tattoo. Optionally provide descriptions for any other SMT categories.

If a person has numerous SMTs, choose the most prominent ones and be specific about the location and description of each. That is, do not provide a general explanation that the person has multiple tattoos.

SMT Code:

Specify the code that identifies the type/location of the SMT. (E.g., TAT L ARM.) Valid codes are found in Appendix E.

SMT Description:

Include a narrative description of the SMT. (E.g., Large Red Rose.) Maximum length is 20 characters. Abbreviate as necessary.

Field 11. Height.

Record the height in feet and inches.

Convert height to the format FII where F is feet and II is inches. For example, record 6'1'' as 601. The minimum height that can be specified is 4' (400) and the maximum height is 7'11'' (711).

Field 12. Weight.

Record the weight in pounds.

The minimum weight that can be specified is 70 pounds; the maximum weight that can be recorded is 600 pounds.

Field 13. Eye Color.

Specify the eye color code. Valid codes are:

Black Hazel Blue Maroon Brown Pink

Gray Multicolored Green Unknown

Field 14. Hair Color.

Specify the hair color code. Valid codes are:

Bald Orange
Black Pink
Blond - use for Blonde or Strawberry Purple

Blue Red - use for Red or Auburn

Brown Sandy
Gray - use for Gray or partially Gray White
Green Unknown

Field 15. Palmprints Available.

Indicate whether or not palm prints were taken. Specify Yes or No.

Field 16. Photo Available.

Indicate whether or not a photo was taken. Specify Yes or No.

Field 17. Employment.

Record the occupation and employer information of the arrested person.

Record occupation; employer's name; employer's address in their individual fields.

Occupation:

Maximum length is 50 characters. Abbreviate as needed.

If the person is unemployed, enter "Unemployed"

Employer's name:

Maximum length is 29 characters. Abbreviate as needed.

Employer's address:

Record the street address, city, state code, and zip code in up to three fields. Maximum length of each field is 35 characters. Abbreviate as needed. For readability on a rap sheet, enter the city, state, and zip code in a field separate from the street address.

Field 18. Residence.

Record the street address, city, state code, and zip code in up to three fields. Maximum length of each field is 35 characters. Abbreviate as needed. For readability on a rap sheet, enter the city, state, and zip code in a field separate from the street address.

Field 19. Date of Arrest.

Record the date in the format YYYYMMDD (e.g., 20090608).

Must be the same as or prior to the current date. Must be the same as or later than each Date of Offense (Field 24).

Field 20. Caution Comments.

Record any additional information that may be helpful on the arrested person's rap sheet. Maximum length 50 characters.

Field 21. Arrest Agency.

Record the ORI of the agency that arrested the person.

Must be the agency ORI previously assigned by the CIC.

Field 22. Driver's License.

Record both the place of issuance and the license number.

Record up to 4 driver's licenses if more than one is associated with the arrested person. For each, specify the place of issuance and record the license number.

Driver's License State:

Specify the place of issuance. Must be one the following: of a U.S. state, Washington DC, a single code representing any US territory, a Canadian province, the country of Mexico, or a code indicating any other country.

Valid codes are found in Appendix D. If the place of issuance is a US territory (e.g., US Virgin Islands), specify 'US'. If the place of issuance is a country other than Canada, or Mexico, specify 'YY' to indicate Other Non-US location.

Driver's License #:

May contain hyphens.

Field 23. Arrest Type.

Specify one of the following: 'Adult' or 'Juv-as-Adult'.

An Adult is a person who is 18 years of age or older on the Date of Offense.

A Juvenile is less than 18 years of age on the Date of Offense and to be treated as an adult (Juv-as-Adult) must be at least 14 years of age on the Date of Offense.

Arrest Type, Date of Birth (Field 7), and each Date of Offense (Field 24) must be consistent.

Occasionally, a person who is only 13 years of age on the Date of Offense is arrested as a Juvenile as Adult with the intention of adding the person to the MCHS criminal history database and at the FBI. To do this:

- Submit the transaction with the correct date of birth. A Reject Notice will be returned.
- If the only error in the notice is that the person is less than 14 years of age on the Date of Offense, contact the CIC.
- The CIC will override the age constraint and resubmit the transaction to MCHS. It will not be necessary for the transaction to be resubmitted from the scanning station.

Field 24. Arrest Charge Set.

For each arrest offense, record the following eight fields of information. Record up to 98 offenses.

(1) Citation.

Specify the statute citation that refers to the Mississippi arrest offense (e.g. 97-3-107).

An updated list of valid statute citations is periodically posted on the DPS public web site.

If you believe that a statute citation is missing in this list or in the pick list on the live scan, contact the CIC.

(2) Charge Description.

Record the description of the arrest charge (e.g. the description of state statute 97-3-107 is Stalking). Maximum length is 140 characters.

(3) Supplement.

Optionally, specify supplemental information about this charge. Specify multiple codes in the format 'code value, code value, ...' to a maximum of 40 characters. (A live scan may automatically insert the commas.) Valid codes are:

Supplement	Supplement Code
Abet	Abet
Accessory After Fact	Accessory After
Accessory Before Fact	Accessory Befor
Aid	Aid
Amphetamine	Amphetamine
Attempted Crime	Attempted
Barbiturate	Barbiturate
Causing felony by Person Under 17 Years of Age	Cause Fel Un 17
Conspiracy	Conspiracy
Contempt of Court for Failure to Make Restitution	Fair Make Rest
Failure to Pay Fine	Fail Pay Fine

(4) Severity.

Specify the severity of the statute citation.

Valid severities are: Felony, Misdemeanor, Unknown, Violation.

Use 'Unknown' for statutes where the DA will determine whether the severity will be Felony or Misdemeanor.

(5) Counts.

Record the number of counts of this offense.

(6) Date of Offense.

Record the date in the format YYYYMMDD (e.g., 19800205).

Each Date of Offense must be consistent with the criteria specified in Arrest Type (Field 23).

Each Date of Offense must be prior to or the same as the Date of Arrest (Field 19).

(7) Action.

Specify the type of action. Valid actions are: Arrest Charge, Charge not forwarded, Citation charge, Indictment charge.

(8) Charge Remarks.

Record remarks that further describe the arrest charge. Maximum length is 50 characters.

2.2 Fingerprints and Amputated or Bandaged Code

It is important that the arrest agency submit quality fingerprints with legible impressions. Submit the best set of fingerprints possible so that both MCHS AFIS and FBI IAFIS can accurately search the fingerprint databases. Poor quality fingerprints, or inconsistent specification of prints are the primary cause of rejections by the FBI and MCHS.

Each rolled finger position must have either a fingerprint or an amputated or bandaged code or both as follows:

- If a full fingerprint impression can be captured: Capture the impression but do not include any information in the Amputated or Bandaged field.
- If a finger is partially amputated and a partial fingerprint impression can be captured: Capture the impression and supply information in the Amputated or Bandaged field. Set the code to 'XX' to indicate a partial amputation.
- If a finger is partially scarred and a fingerprint impression can be captured: Capture the impression but do not include any information in the Amputated and Bandaged field.
- If a finger cannot be captured: Supply information in the Amputated or Bandaged field. Set the code to 'UP' to indicate that a fingerprint impression cannot be captured (is unprintable).

The Amputated or Bandaged field must include the finger position:

Finger Position	Finger Number
Right thumb	1
Right index finger	2
Right middle finger	3
Right ring finger	4
Right little finger	5
Left thumb	6
Left index finger	7
Left middle finger	8
Left ring finger	9
Left little finger	10

In addition, all corresponding plain prints must be included:

- If a rolled thumb impression is included, the corresponding plain thumb impression must be included.
- If any of index, middle, ring, and little finger impressions are included, the corresponding plain four impressions must be included.
- The plain four impressions must include the same fingers that are included in the corresponding rolled finger impressions.

12

November 10, 2015

2.3 Palm Prints (If Supported)

If palm prints are captured, include the following for each hand:

- Full palm if supported by the live scan, otherwise an upper/lower palm pair
- and -
- A writer's palm.

2.3.1 Capturing Full Palms and Writer's Palms

Refer to the extracts from the FBI's "A Practical Guide for Palm Print Capture" in Appendix G. This describes the hand area that must be captured for each palm position and the proper orientation. The FBI has reported that the most common problem that prevents palm prints from being enrolled in the National Palm Print Database is that the distals are incomplete in a full palm impression.

The Amputated or Bandaged field discussed below is for palm prints. Do not include palm print amputated or bandaged information in the Amputated or Bandaged field for fingerprints.

Both full palm positions must have either a palm print or an amputated or bandaged code or both as follows:

- If a full palm impression can be captured: Capture the impression. Do not include any information in the Amputated or Bandaged field.
- If a palm is partially amputated and a partial palm print impression can be captured: Capture the impression and supply information in the Amputated or Bandaged field. Set the code to 'XX' to indicate a partial amputation.
- If a palm is partially scarred and a palm print impression can be captured: Capture the impression but do not include any information in the Amputated and Bandaged field.
- If a palm cannot be captured: Supply information in the Amputated or Bandaged field. Set the code to 'UP' to indicate that a palm print impression cannot be captured (is unprintable).

Both writer's palm positions must have either a palm print or an amputated or bandaged code or both as follows:

- If a writer's palm impression can be captured: Do not include any information in the Amputated or Bandaged field.
- If a writer's palm is partially amputated and a partial palm print impression can be captured: Supply information in the Amputated or Bandaged field. Set the code to 'XX' to indicate a partial amputation.

The Amputated or Bandaged field must include the finger position:

Palm Position	Palm Number
Right full palm	21
Right writer's palm	22
Left full palm	23
Left writer's palm	24

2.3.2 Capturing Upper/Lower Palm Pairs and Writer's Palms

Refer to the extracts from the FBI's "A Practical Guide for Palm Print Capture" in Appendix G. This describes the hand area that must be captured for each palm position and the proper orientation. The FBI has reported that the most common problem that prevents palm prints from being enrolled in the National Palm Print Database is that the distals are incomplete in an upper palm impression.

The Amputated or Bandaged field discussed below is for palm prints. Do not include palm print amputated or bandaged information in the Amputated or Bandaged field for fingerprints.

All upper and lower palm positions must have either a palm print or an amputated or bandaged code or both as follows:

- If an upper or lower palm impression can be captured: Capture the impression. Do not include any information in the Amputated or Bandaged field.
- If an upper or lower palm is partially amputated and a partial palm print impression can be captured: Capture the impression and supply information in the Amputated or Bandaged field. Set the code to 'XX' to indicate a partial amputation.
- If an upper or lower palm is partially scarred and a palm print impression can be captured: Capture the impression but do not include any information in the Amputated and Bandaged field.
- If a upper or lower palm cannot be captured: Supply information in the Amputated or Bandaged field. Set the code to 'UP' to indicate that a palm print impression cannot be captured (is unprintable).

If writer's palms are included, both writer's palm positions must have either a palm print or an amputated or bandaged code or both as follows:

- If a writer's palm impression can be captured: Do not include any information in the Amputated or Bandaged field.
- If a writer's palm is partially amputated and a partial palm print impression can be captured: Supply information in the Amputated or Bandaged field. Set the code to 'XX' to indicate a partial amputation.

The Amputated or Bandaged field must include the finger position:

Palm Position	Palm Number
Right writer's palm	22
Left writer's palm	24
Right lower palm	25
Right upper palm	26
Left lower palm	27
Left upper palm	28

2.4 Facial Photos (If Supported)

If facial photos are captured:

- At least one frontal image is required.
- Up to three additional facial photos may be included. Generally this would include two profile photos.

Some textual information must also be entered to describe each photo. If required fields are missing or if field values are invalid, a Transaction Warning Notice will be returned (see section 3.1.3).

Only photos that are SAP Level 40 will be accepted by the FBI. Please refer to the MCHS Tenprint Interface Control Document (ICD) and discuss the requirements with your live scan vendor.

2.5 SMT Photos (If Supported)

If photos of scars, marks, and tattoos are captured:

• Up to three images may be included.

Some textual information must also be entered to describe each photo. If required fields are missing or if field values are invalid, a Transaction Warning Notice will be returned (see section 3.1.3).

Note that the SMT Descriptor codes for SMT Photos are not the same as those used in Field 10 Scars, Marks, and Tattoos. The SMT Descriptor codes are included in Appendix F.

3.0 RAP SHEETS AND ERROR RESPONSES

Every arrest fingerprint transaction generates one or more responses as described in the following sections. They are sent to the transmitting agency. The agency may elect to receive them via a printer on the live scan or a GroupWise email account.

3.1 Mississippi Responses

3.1.1 Mississippi Rap Sheet

When an arrest transaction is successfully processed, MCHS generates an in-state Mississippi Rap Sheet.

3.1.2 Transaction Reject Notice

If MCHS detects an error in the identification/arrest data or there is a problem with the fingerprints, MCHS generates a **Transaction Reject Notice**. Either correct the data or create a new transaction and retransmit to MCHS. The following is a sample of a Transaction Reject Notice.

```

Each error message is described in the Tenprint Transaction Reject Notice and Warning Notice Error Messages document. It is available on the DPS public web site.

3.1.3 Transaction Warning Notice (for Palm Prints, Facial Photos, and SMT Photos Only)

If a transaction contains palm prints, facial photos, or SMT photos and errors are detected, MCHS generates a **Transaction Warning Notice**. A Transaction Warning Notice is similar to the Transaction Reject Notice but the title on the notice is "TRANSACTION WARNING NOTICE".

If there are no errors in the identification/arrest data, the transaction will be accepted by MCHS even if a

Warning Notice is generated. In this case, it is not possible to correct the errors in the palm print, facial photo, or SMT data.

If there are errors in the identification/arrest data and errors related to palm prints, facial photos, or SMT photos, correct all errors before resubmitting the transaction.

If a Warning Notice describes errors that are not related to information you entered, the problems should be reported to the live scan vendor.

Each warning message is described in the Tenprint Transaction Reject Notice and Warning Notice Error Messages document. It is available on the DPS public web site.

3.2 FBI Responses

3.2.1 FBI Rap Sheet

MCHS electronically forwards all arrests with a felony or unknown severity and assorted misdemeanor arrests to the FBI. When an arrest transaction is successfully processed, the FBI generates an **FBI Response** that contains an **FBI Rap Sheet**.

3.2.2 FBI Error Response

Occasionally the FBI detects an error in the identification/arrest data or has a problem with the fingerprints. In this case, the FBI generates an **FBI Response** that describes the **Error**.

If the FBI response is an Error, contact the CIC for instructions on how to obtain an FBI Rap Sheet. Do <u>not</u> resubmit the transaction. If the arrest needs to be resubmitted to the FBI, contact the CIC for instructions.

4.0 COMMON ARREST TRANSACTION ERRORS

The following are common reasons that arrest transactions are rejected with Reject Notices returned to the arrest agency.

- 1. Invalid relationships between Date of Arrest (Field 19), Date(s) of Offense (Field 24), and the current date. To ensure that the transaction is added to the criminal history, verify the following:
 - The Date of Arrest must be prior to or the same as the current date.
 - Each Date of Offense must be prior to or the same as the current date.
 - Each Date of Offense must be prior to or the same as the Date of Arrest.
- 2. Invalid relationships between Arrest Type (Field 23), and the following dates: Date(s) of Birth (Field 5), Date of Arrest (Field 19), and Date(s) of Offense (Field 24). To ensure the transaction is added to the criminal history, verify the following:
 - If the Arrest Type is 'Adult', the person must be at least 18 that is, the Date of Birth must be 18 or more years prior to each Date of Offense and the Date of Arrest.
 - If the Arrest Type is 'Juvenile Treat as Adult', the person must be at least 14 and less than 18 that is, the Date of Birth must be at least 14 years before each Date of Offense and the Date of Arrest and no more than 18 years before each Date of Offense and the Date of Arrest.
- 3. Invalid Statute Citation (Field 24). The statute citation is not current or the format is incorrect. To ensure that the transaction is added to the criminal history, verify the following:

The statute citation must be a currently valid statute citation. The format must match exactly; this includes numbers, letters, parentheses, hyphens and spaces. Refer to Appendix A for a discussion on how a live scan provides the list of currently valid statute citations.

The list of valid statute citations is found on the DPS public web site.

If you believe that a statute citation is missing in this list or in the pick list on the live scan, contact the CIC.

- 4. Missing Driver's License Number (Field 22). The DL State is specified but the Number is either missing or contains a value such as 'None' or '\'.
- 5. Invalid Country of Citizenship (Field 6). The Country of Citizenship must be one of those listed in Appendix C.
- 6. Invalid SMT Code (Field 10). The SMT Code must be one of those listed in Appendix E. Refer to Appendix A for a discussion on how a live scan provides the list of currently valid SMT codes.
- 7. Invalid Social Security Number (Field 2). The Social Security Administration does not issue numbers with certain patterns.
- 8. Problems with the fingerprints. The most common errors include:
 - Overall poor fingerprint quality including prints that are too dark or too light.
 - Fingers out of sequence.
 - The same finger printed twice.
 - Fingers not fully rolled.

5.0 HOW TO CORRECT ERRONEOUS ARREST INFORMATION

5.1 Retransmitting Rejected Transactions

See section 3.1 Mississippi Responses.

5.2 Correcting Biographic and Arrest Data on MCHS

To correct biographic and arrest data that has been added to the person's MCHS criminal history, contact the CIC's Special Processing Unit at 800-594-3997 or 601-933-2600.

6.0 DISPOSITION FORMS

Each Mississippi Rap Sheet is accompanied by two disposition forms - a Prosecutor Disposition Form and a Court Disposition Form. The top of the form contains the ATN assigned to the arrest and the person's identification information, and also lists the arrest charge information.

Forward these forms to the office of the DA that will handle the case.

7.0 DNA DATABASE COLLECTION FORM

Under certain circumstances, a Mississippi Rap Sheet is accompanies by the DNA Database Collection Form. Instructions regarding use of this form are provided by the Mississippi Crime Laboratory.

APPENDIX A EDIT TABLE DOWNLOADS AND ATN BLOCKS FROM MCHS

Edit Table Download Message

MCHS periodically downloads the current list of codes and statute citations to be used for the fields listed below. This is called the 'Edit Table Download'.

- Field 3 Miscellaneous Id # / Miscellaneous Number Type
- Field 4 Names / Suffix
- Field 5 Place of Birth
- Field 6 Country of Citizenship
- Field 8 Sex/Gender
- Field 9 Race
- Field 10 Scars, Marks, and Tattoos / SMT Code
- Field 13 Eye Color
- Field 14 Hair Color
- Field 15 Palmprints Available
- Field 16 Photo Available
- Field 22 Driver's License/Driver's License State
- Field 23 Arrest Type
- Field 24 Arrest Charge Set / Statute Citation
- Field 24 Arrest Charge Set / Supplement
- Field 24 Arrest Charge Set / Severity
- Field 24 Arrest Charge Set / Action
- Amputated or Bandaged Code

The live scan uses the list of codes and statute citations in the Edit Table Download to ensure that an operator transmits transactions that contain only valid codes and statute citations. How this is implemented will vary from one live scan vendor to the next.

To ensure the live scan has a current list of codes and statutes, go to Field 14, Hair Color and view the list of values. The last entry, 'ZZDoNotUse' contains a date. If the date is more than 20 days old, the list is likely to be out of date. This can be verified by contacting the CIC. If it is not the most recent, contact the live scan vendor to have the problem corrected.

A common implementation is to present a pick list, such as in a drop down menu, of valid values for each field that requires a code. Some live scans allow the operator to override the pick list and type in the value. If the live scan does not validate the entered value against the list of codes and statutes, it is possible to transmit invalid codes. As a result, many transactions are rejected, with a Transaction Reject Notice sent to the transmitting agency. To avoid rejected transactions, always use the pick lists.

ATN Block Message

When a live scan is first installed, MCHS assigns it a list of Arrest Tracking Numbers (ATNs) by sending an ATN Block Message. The live scan assigns an ATN to each arrest transaction. The message contains two blocks and each contains a large number of ATNs, but eventually the live scan will need to request additional numbers.

When the live scan has used all ATNs in the first block, it should notify the operator. The live scan then

begins using the second block. The operator should contact the CIC to request a new ATN Block Message with additional ATNs so that the live scan never runs out of ATNs.

APPENDIX B PLACE OF BIRTH CODES

The following codes are used by MCHS as of the date of this manual.

- If the POB is in the United States, specify the state, 'DC' for District of Columbia, 'PR' for Puerto Rico, or 'US' for any US territory (e.g., US Virgin Islands).
- If the POB is in Canada, specify the Canadian province.
- If the POB is a foreign country other than Canada, specify the country or possession/territory if it is in this list.
- If the POB is a foreign country but is not in this list, specify 'YY' for Other Non US.
- If the POB is unknown, specify 'XX' for Unknown.

APPENDIX C COUNTRY OF CITIZENSHIP CODES

The following codes are used by MCHS as of as of the date of this manual.

- If the country of citizenship is the United States, specify 'US' for United States of America.
- If the country of citizenship is a foreign country, specify the country. (Some locations that are valid as a place of birth are not a country of citizenship. For example, Ontario is a place of birth but the corresponding country of citizenship is Canada; Guadeloupe is a place of birth but the corresponding country of citizenship is France.)
- If the country of citizenship is a foreign country but is not in this list, specify 'YY' for Other Non US.
- If the country of citizenship is unknown, specify 'XX' for Unknown.

APPENDIX D DRIVER'S LICENSE PLACE OF ISSUANCE CODES

Driver's License Place of Issuance is also known as Driver's License State. However, the list consists of more than US states.

The following codes are used by MCHS as of the date of this manual.

- If the Driver's License Place of Issuance is in the United States, specify the state, 'DC' for District of Columbia, 'PR' for Puerto Rico, or 'US' for any US possession/territory (e.g., US Virgin Islands).
- If the Driver's License Place of Issuance is in Canada, specify the Canadian province.
- If the Driver's License Place of Issuance is in Mexico, specify 'MM' for Mexico.
- If the Driver's License Place of Issuance is a foreign country other than Canada or Mexico, specify 'YY' for Other Non US.

APPENDIX E SCARS, MARKS, AND TATTOOS CODES

The following codes are used by MCHS as of the date of this manual. (They are a subset of the full set of SMT Codes used by NCIC.)

Codes are grouped by category in the following order: Aids, Artificial, Deaf, Deformities, Medical Condition, Missing, Moles, Other Characteristics, Removed Tattoos, Scars, Skin Discolorations, Tattoos.

Scars, Marks, Tattoos, etc.	Code
Aids, Denture, lower only	DENT LOW
Aids, Denture, upper and lower	DENT UP LO
Aids, Denture, upper only	DENT UP
Aids, Glasses (prescription)	GLASSES
Aids, Gold tooth	GOLD TOOTH
Aids, Silver tooth	SLVR TOOTH
Artificial, Arm, left	ART L ARM
Artificial, Arm, right	ART R ARM
Artificial, Ear, left	ART L EAR
Artificial, Ear, right	ART R EAR
Artificial, Eye, left	ART L EYE
Artificial, Eye, right	ART R EYE
Artificial, Foot, left	ART L FT
Artificial, Foot, right	ART R FT
Artificial, Hand, left	ART L HND
Artificial, Hand, right	ART R HND
Artificial, Leg, left	ART L LEG
Artificial, Leg, right	ART R LEG
Deaf, left and right ears	DEAF
Deaf, left ear	DEAF L EAR
Deaf, one ear, nonspecific	DEAF EAR
Deaf, right ear	DEAF R EAR
Deaf-mute	DEAF MUTE
Deformities, Cauliflower ear, left	CAUL L EAR
Deformities, Cauliflower ear, right	CAUL R EAR
Deformities, Cleft lip	CL LIP
Deformities, Cleft palate	CLEFT PAL
Deformities, Crippled arm, left	CRIP L ARM
Deformities, Crippled arm, right	CRIP R ARM
Deformities, Crippled finger(s), left hand	CRIP L FGR
Deformities, Crippled finger(s), right hand	CRIP R FGR
Deformities, Crippled foot, left	CRIP L FT
Deformities, Crippled foot, right	CRIP R FT
Deformities, Crippled hand, left	CRIP L HND
Deformities, Crippled hand, right	CRIP R HND
Deformities, Crippled leg, left	CRIP L LEG
Deformities, Crippled leg, right	CRIP R LEG
Deformities, Crippled toe(s), left	CRIP L TOE
Deformities, Crippled toe(s), right	CRIP R TOE
Deformities, Extra breast, nonspecific	EXTRA BRST
Deformities, Humpbacked	HUMPBACKED
Deformities, Protruding lower jaw	PROT L JAW
Deformities, Protruding upper jaw	PROT U JAW
Deformities, Shorter left leg	SHRT L LEG
Deformities, Shorter right leg	SHRT R LEG

Scars, Marks, Tattoos, etc.	Code
Eye Disorders, Blind, both eyes	BLIND
Eye Disorders, Blind, left eye	BLND L EYE

APPENDIX F SMT DESCRIPTOR CODES FOR SMT PHOTOS

SMT Descriptors / Tattoo Class

Class description	Class code
Human Forms and Features	HUMAN
Animals and Animal Features	ANIMAL
Plants	PLANT
Flags	FLAG
Objects	OBJECT
Abstractions	ABSTRACT
Insignias & Symbols	SYMBOL
Other Images	OTHER

Tattoo subclasses for each class code are listed in the following tables.

SMT Descriptors / Tattoo Subclass

Human tattoo subclasses

Subclass	Subclass code
Male Face	MFACE
Female Face	FFACE
Abstract Face	ABFACE
Male Body	MBODY
Female Body	FBODY
Abstract Body	ABBODY
Roles (Knight, Witch, man, etc.)	ROLES
Sports Figures (Football Player, Skier, etc.)	SPORT
Male Body Parts	MBPART
Female Body Parts	FBPART
Abstract Body Parts	ABBPART
Skulls	SKULL
Miscellaneous Human Forms	MHUMAN

Animal tattoo subclasses

Subclass	Subclass code
Cats & Cat Heads	CAT
Dogs & Dog Heads	DOG
Other Domestic Animals	DOMESTIC
Vicious Animals (Lions, etc.)	VICIOUS
Horses (Donkeys, Mules, etc.)	HORSE
Other Wild Animals	WILD
Snakes	SNAKE
Dragons	DRAGON
Birds (Cardinal, Hawk, etc.)	BIRD
Spiders, Bugs, and Insects	INSECT
Abstract Animals	ABSTRACT
Animal Parts	PARTS
Miscellaneous Animal Forms	MANIMAL

Plant tattoo subclasses

Subclass	Subclass code
Narcotics	NARCOTICS
Red Flowers	REDFL
Blue Flowers	BLUEFL
Yellow Flowers	YELFL
Drawings of Flowers	DRAW
Rose	ROSE
Tulip	TULIP
Lily	LILY
Miscellaneous Plants, Flowers, Vegetables	MPLANT

Flag tattoo subclasses

Subclass	Subclass code
American Flag	USA
State Flag	STATE
Nazi Flag	NAZI
Confederate Flag	CONFED
British Flag	BRIT
Miscellaneous Flags	MFLAG

Object tattoo subclasses

Subclass	Subclass code
Fire	FIRE
Weapons (Guns, Arrows, etc.)	WEAP
Airplanes	PLANE
Boats, Ships, & Other Vessels	VESSEL
Trains	TRAIN
Cars, Trucks, and Vehicles	VEHICLE
Mythical (Unicorns, etc.)	MYTH
Sporting Objects (Football, Ski, Hurdles, etc.)	SPORT
Water & Nature Scenes(Rivers, Sky, Trees, etc.)	NATURE
Miscellaneous Objects	MOBJECTS

Abstract tattoo subclasses

Subclass	Subclass code
Figure(s)	FIGURE
Sleeve	SLEEVE
Bracelet	BRACE
Anklet	ANKLET
Necklace	NECKLC
Shirt	SHIRT
Body Band	BODBND
Head Band	HEDBND
Miscellaneous Abstract	MABSTRACT

Symbol tattoo subclasses

Subclass	Subclass code
National Symbols	NATION
Political Symbols	POLITIC
Military Symbols	MILITARY
Fraternal Symbols	FRATERNAL
Professional Symbols	PROFESS
Gang Symbols	GANG
Miscellaneous Symbols	MSYMBOLS

Other tattoo subclasses

Subclass	Subclass code
Wording (Mom, Dad, Mary, etc.)	WORDING
Freeform Drawings	FREEFRM
Miscellaneous Images	MISC

APPENDIX G EXTRACTS FROM FBI'S "A PRACTICAL GUIDE FOR PALM PRINT CAPTURE"

Parts of the Palm

The entire area of the full palm (See Figure 1) is defined as that area extending from the top of the *wrist bracelet* to the tips of the fingers and can be represented as one or two scanned images. If two images are used to represent the full palm, the lower image shall extend from the top of the *wrist bracelet* to the top of the *interdigital* area (*proximal* finger joint) and shall include the *thenar* and *hypothenar* areas of the palm. The upper image shall extend from the bottom of the *interdigital* area to the upper tips of the fingers. This provides an adequate amount of overlap between the two images to facilitate subject verification. By matching the ridge structure and details contained in the common *interdigital* area, an examiner can confidently state that both images came from the same palm. The inclusion of the finger impressions, particularly the distal segments, allows the palm print to be verified against a tenprint record for confirmation of identity.

Figure 1 - Finger and Palm Segment Positions

November 10, 2015

Full Palm Capture - 4 Image Capture

Upper/Lower Palm Capture - 6 Image Capture
