Course Description:

The Post Seizure Investigations course focuses on the immediate investigative steps following a roadside seizure of drugs and/or drug proceeds in order to determine the origination and/or destination of the seized drugs and/or drug proceeds. The information provided during the Post Seizure Investigations course will assist the officer in developing the information necessary to establish probable cause for search warrants as a result of a roadside seizure of drugs. The objective of the Post Seizure Investigations course is to expose the officer to the thought process that drug traffickers will keep evidence of drug trafficking at their home such as large quantities drugs to be sold, drug proceeds, records of illicit activity, and other items associated with drug trafficking.

The course builds on established case law that people involved in criminal activity will ordinarily keep evidence of their crime(s) at their residence. Students will gain valuable information relative to writing warrants as a result of a roadside seizure of drugs vital to reducing drug related criminal activity. The course curriculum incorporates the most up to date legal aspects of search warrants.
