TO: Chiefs, Sheriffs and Administrators

FROM: Lt. Col. Thomas E. Tuggle II, Director

Basic class training is \$3,600 per twelve weeks and prorated for those individuals who do not complete the entire twelve week course. There *will no longer be* any additional charges for shorts and caps.

For the potential participants of the Basic Law Enforcement Training Class, we will be offering the pre-enrollment physical fitness test on the specified date. The test will also be administered as usual on the class reporting day.

If you have an individual who may be border line in the area of physical fitness and would like to have an assessment of their readiness for the basic program, please take advantage of this opportunity. Our failure rate on opening day of training has dropped considerably since this program has been in place.

We require the application of the recruit with the **physician's approval** before the test can be administered. Upon successful completion, the student **will not** be required to re-take the test at the beginning of the training session. However, the test will be given again on reporting day to those students who do not take the Pre-entrance test and to those who failed and wish another opportunity.

If a student fails any portion, you will be given the results along with a program for improvement of the individual officer. We have found those who fail the pre-enrollment test are generally very close to the minimum standard and normally make dramatic improvements if given the chance and a little time.

Our assessment of the fitness level of the officer and your encouragement will provide the ingredients to have them ready to meet the challenges of the program.

We are hopeful this evaluation will assist you where you may have some doubts or concerns about the conditioning of your officer. It will eliminate any surprises associated with having to dismiss someone from training before it even gets started. If we can assist you in any way or answer any questions concerning this test please do not hesitate to call.

BASIC LAW ENFORCEMENT TRAINING SUPPLY LIST

The following information is provided for your convenience so that your officer may report to the Academy with the clothing and equipment needed for this training course.

Mississippi Law Enforcement Officer Training Academy firearms training has and always will strive to provide the very best instruction, facility and equipment available anywhere in the country. There has been a curriculum change from 40 hours of firearms training to 52 hours. The number of students training with semi-automatic has continued to increase. A basic recruit will now fire a minimum of 1250 rounds and use quite a few more targets. These changes will require a slight increase in the differential of ammunition cost if the student uses a semi-auto pistol during training. We furnish all semi-autos with re-manufactured ammunition. The cost differential for training with a semi-auto will be as follows: **(Your agency can be billed or you may send a check)**

PACKET MEMORANDUM

Dear Law Enforcement Administrator and Examining Physician:

This training packet contains a medical evaluation, a reimbursement supplement and an application for enrollment to the academy. Please complete all forms in accordance with the instructions below. Submit the completed packet (*pages 1 – 12*) to the academy at least one week prior to attending a training course (forms that have been completed six months or more prior to training cannot be accepted). With an increased awareness of the importance of physical fitness in the law enforcement profession, as well as in the overall maintenance of quality of life, the Board on Law Enforcement Officer Standards and Training (BLEOST) has enhanced fitness standards for law enforcement candidates. Students will be participating in vigorous physical fitness training and defensive tactics, as well as stress-related training (physical and mental), in such areas as driving, firearms and officer survival. Driving and firing events incorporate seasonal inclement weather with day and night sessions to further enhance stress-related training.

This medical examination report should provide an adequate evaluation of the physical condition of a law enforcement candidate and identify potential problem areas in each candidate's ability to successfully complete training. Agencies are urged to consider carefully any decision to enroll a student in training who has a potential problem. Students with weight problems, who have not been active in a physical fitness program or who have some medical difficulty, will have a greater probability of not completing the course. If at all possible, fitness levels should be at or above the minimum levels established in this packet prior to attending the basic course. The procedures for completing these forms are as follows:

Physical Fitness Requirements

The Board on Law Enforcement Officer Standards and Training (BLEOST), in recognizing the importance of physical fitness for academy performance and subsequent job performance, has established physical fitness training standards that must be achieved in order to successfully complete the training program. The board has established a test that effectively measures cardiovascular endurance and strength. An additional component of fitness, body weight and composition (% of body fat), has a great impact on the examinee's ability to perform the other tests. The evaluation of the candidate's fitness begins with a physician's examination and a determination of the ration of fat to lean tissue. If an individual's weight exceeds the threshold weight, then a skinfolds caliper measurement should be taken to determine body fat percentage.

Beginning July 1, 1995, the BLEOST will require all board-approved training academies to administer an entry physical fitness test for those students reporting to the 12-week basic training program. The examination will be given immediately upon reporting for training and will determine whether a student can remain in the program. This test is an eligibility requirement. A passing score of 50% must be achieved. Those students who fail the examination must leave the academy. They may, however, resubmit their application to attend a future training class.

The test is comprised of four components: Flexibility, agility run, push-ups, and a 1½ mile run. It is the same test administered at the end of the program with one exception: The entry examination requires 50% to pass while the final test mandates 70%. This new requirement does not relieve students from participating in P.T. training once they pass the entry requirement. Trainees will continue to participate in scheduled P.T. training and must also pass a final P.T. test with a minimum score of 70% in order to graduate. It is important that all students understand this since even a physically fit person who has engaged in poor eating or drinking habits before reporting could fail the test.

Physical fitness can only be achieved over time. It requires a commitment to regular exercise and good eating habits. Thus it is important to disseminate this information so that all impacted personnel can prepare ahead of time. Scores needed to enter training and to graduate are as follows:

Age Groups		20-29		30-39		40-50+
